DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilkes (US 6,024,683) in view of Hayashi (US 5,932,985).

Wilkes disclose the invention substantially as claimed except for the clamp and punch that travel with the work at speed. In that regard, Hayashi teaches a punch with an inherent clamp due to the design thereof which performs the punching operation at speed. Thus, providing a more efficient means of cutting and punching or die working. Note Fig. 1. It would have been obvious to the ordinary artisan at the time of the instant invention to provide the device of Wilkes with the clamp, punch, punch block, and actuator as taught and suggested by Hayashi in order to facilitate more efficient operation thereof.

Conclusion
